

User Manual

Compatibility Note

- Please ensure that your car is compatible with wired CarPlay or Android Auto.
- The wireless CarPlay feature requires an iPhone 6 or a newer model with iOS 10 or higher.
- The wireless Android Auto feature requires an Android phone with version 11 or higher that supports the latest Android Auto features.

To verify if your vehicle supports wired CarPlay or wired Android Auto:

- Connect your iPhone or Android smartphone to the vehicle using a USB data cable. The connection interface logo will then appear on the car's display screen.
- Refer to the compatibility list or contact your car manufacturer directly for confirmation.

OTHER DEVICES

Aziot CarPlay-XXXX

Use CarPlay with
"Aziot CarPlay-XXXX"

Not Now

Use CarPlay

1. Turn on the vehicle and wait for the system to fully load.
2. Insert the adapter into the vehicle's USB-A or USB-C port.
3. Once the adapter is successfully connected to the vehicle, the screen will display the adapter's Bluetooth name as **"Aziot CarPlay-XXXX"**.
4. Open the Settings on your iPhone and enable "Bluetooth" and "Wi-Fi".
5. Go to the "Bluetooth" settings and select the adapter with the prefix "Aziot Carplay-xxxx" from the "OTHER DEVICES" list.

6. Wait for about 20-30 seconds, and a "Bluetooth Pairing Request" notification will appear on your phone screen. Click "Pair" to proceed.

7. A dialog box will appear on the phone screen asking "Use CarPlay with **"Aziot CarPlay-XXXX"**". Click "Use CarPlay" to establish a connection between your phone and the adapter.

8. After Bluetooth pairing is complete and the CarPlay connection is established, the car screen will automatically switch to CarPlay mode.

Switching Different Phones

1. Simultaneously turn off the Bluetooth and Wi-Fi on the currently connected phone.
 2. Unplug and reinsert the adapter.
- (Important)**
3. Turn on the Bluetooth on the other phone, search for and pair with the adapter's Bluetooth named **"Aziot CarPlay-XXXX"**.
 4. If the system prompts that the Bluetooth is in use, try pairing multiple times to complete the switch.

Android Auto

1. Turn on the vehicle and wait for the system to fully load.

2. Insert the adapter into the vehicle's USB-A or USB-C port.

3. Once the adapter is successfully connected to the vehicle, the screen will display the adapter's Bluetooth name as **"Aziot CarPlay-XXXX"**.

4. Open the Settings on your phone and enable "Bluetooth" and "Wi-Fi".

5. Go to the "Bluetooth" settings, Click "Pair New Device", and select the adapter with the prefix **"Aziot CarPlay-XXXX"** from the "Available devices" list.

6. Wait for about 20-30 seconds, and a dialog box will appear on your phone screen asking "Pair with **"Aziot CarPlay-XXXX"**? Click "Pair" to establish a connection between your phone and the adapter.

7. After Bluetooth pairing is complete and the Android Auto connection is established, the car screen will automatically switch to Android Auto mode.

OTA Online Update

1. Power the adapter.

2. Open the Settings on your iPhone and enable "Wi-Fi".

3. Go to the "Wi-Fi" settings and select the adapter with the prefix **"Aziot Carplay-XXXX"** from the "NETWORKS" list, and the default password is **"88888888"**.

4. Enter the IP address **"192.168.1.101"** in your phone's web browser.

5. Click "Update" on the OTA page. (Do not exit the page during the upgrade process to avoid interrupting it.)

6. Once the upgrade is complete, the page will display "Update Completed."

7. Unplug and replug the adapter.

8. Delete the old Bluetooth connection on your phone and establish a new Bluetooth connection to start using the upgraded product.
