

User Manual

Aziot CarPlay

Please read the manual carefully before using the product.
We recommend keeping this manual for future reference.

Compatibility Note

- Please make sure your car Supports wired carPlay/Android Auto
- Required iPhone6 or later iPhone models with IOS 10 or above for wireless CarPlay function
- Required an Android smartphone that support latest Android Auto function and with Android 11 or higher of the Android operating system for wireless Android Auto function.

How to confirm if your car has Apple wired Car - Play or Android Auto function

Method 1:

Connect your iPhone or Android smartphone to your car by USB data cable and see car - play or android auto logo on your car display.

Method 2:

Check the compatible list below or check with your car manufacturer to see if your car has this capability. Check out the website for supported car models.

1

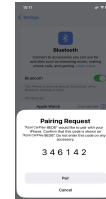

How to use

1. Start the car and wait for the car display unit system to be loaded.

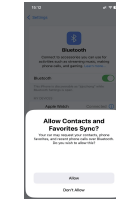

2. Connect the Wireless CarPlay Android auto adapter to the USB - A or USB - C port in your car; please be sure plug the adapter into the port that is for wired apple carPlay or android auto.

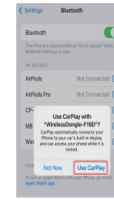

3. Open WiFi and Bluetooth on your iPhone/Android smartphone and find the BT named "Aziot CarPlay - xxx". Click on Pair; Click on 'Allow'; Click on Use CarPlay or 'Use Android Auto'.

1. Pair Bluetooth

2. Allow contacts and favorites Sync

3. Use CarPlay

4. You are ready to enjoy wireless CarPlay or wireless Android Auto.

2

LED Light Description

- Cyan status: Power on indicator
- Green status:
CarPlay connecting (Green light fast flashing).
CarPlay Connected (Green light slow flashing).
- Blue status:
Android connecting (Blue light fast flashing)
Android connected (Blue light slow flashing)

Please note

1. The wireless CarPlay Android Auto adapter working principle is uses BT to establish a pairing between the iPhone/ Android smartphone and the vehicle, then switches to using WiFi to maintain the wireless connection after the BT pairing is successful, the iPhone/Android smartphone WiFi will automatically connect to the adapter's WiFi, and then disconnect the Adapter BT connection by default for carplay and automatically connect to your vehicle BT by default for Android auto.

2. Please ensure wireless CarPlay Android auto Adapter power indicates light is on.

3. Please ensure that your car models supports wired CarPlay/Android auto

Package list

1xWireless Adapter
1xUser Manual
1xType-C connector

FAQ

1. What is the Wi-Fi password for the Aziot CarPlay Adapter?

No Wi-Fi password is required. The connection process starts with Bluetooth Pairing. Once paired successfully, Wi-Fi will connect automatically. Ensure your phone's Wi-Fi is turning on and not in use by other devices during pairing.

2. After pairing, Android Auto doesn't start, isn't compatible, or the USB isn't recognized. What should I do?

- If this is your first time using Android Auto, connect your phone with a USB data cable to activate Android Auto.
- Make sure Android Auto on your phone is updated to the latest version (Check in Google Play Store).
- If issues continue, turn off Bluetooth on your phone, go to your phone's application settings, and clear the Android Auto cache. After clearing, restart the adapter and reconnect via Bluetooth.

3. Audio input/output issues (e.g., calls rejected, forwarded to voice mail, no sound, microphone not working, music playback interrupted, or abnormal voice function). What should I check?

- 1) Ensure your phone's Bluetooth is not connected to other devices such as earphones, smart Watches, or other accessories. If it is, disconnect them or turn off Bluetooth for those devices, then reconnect only to the Aziot CarPlay Adapter.
- 2) During a call, check that your phone's Audio output is set to CarPlay/Android Auto.

4

4. Can my phone use other Wi-Fi while connected to the Aziot CarPlay Adapter?

No. When your phone is connected to the Aziot CarPlay Adapter, its Wi-Fi is dedicated to the adapter. This means you cannot use other Wi-Fi networks at the same time. But you can still use your phone's mobile data (SIM Card internet).

5. What should I do if the Aziot CarPlay Adapter doesn't reconnect automatically?

- 1) Ensure that Bluetooth and Wi-Fi on your phone are turned on and not in use by other devices.
- 2) If reconnection fails, clear the pairing record, restart your phone, and re-pair the adapter.

6. Can the Aziot CarPlay Adapter be paired with multiple phones?

Yes. The Aziot CarPlay Adapter can be paired with up to five phones, but only one phone can connect at a time. To pair a new phone, disconnect the current one. By default, the adapter will automatically reconnect to the most recently paired phone.

7. Why can't my phone find the Bluetooth or Wi-Fi of the Aziot CarPlay Adapter?

- Ensure the adapter's blue power light is on, indicating it is active.
- Plug the adapter into the correct USB port for CarPlay/Android Auto in your car.
- Try connecting with another phone to confirm if the issue is device-specific.
- If only one phone cannot detect the adapter, reset that phone's Bluetooth and Wi-Fi settings, then restart it. And now again try to connect.
- If the problem persists across multiple phones, the adapter may be defective. Please contact our support Team.

8. Can I watch YouTube videos using the Aziot CarPlay Adapter?

No. For safety reasons, both CarPlay and Android Auto do not allow video playback while driving.

Online update

- the adapter works properly it means the current version is suitable for your car. It is not recommended to update the firmware
- Only try this solution when the problem you cannot solve from the "FOA"

1. Power up the adapter.

2. Connect the adapter's WiFi the password is "12345678" "88888888"

3. Open web browser and enter "192.168.110.1" or "192.168.5.1" to enter the setting page and click "Online Update" for Car - play function

4. For Android auto, Please Click "Switch P2P", Then Click "OK"

5. Return to WiFi Connect, Find Wi - Fi Direct option, Then connect the Available devices (Aziot CarPlay - ****) (This step is for reference only for Android phone users; if use iPhone to update the firmware, please ignore "Wi - Fi Direct" step)

6. Return to the browser's page Click "Update" (PS: the signal light will flash when it reached 70%, and it will return to normal after successful)

7. On the same page, you could also fill in the car brand, model, years, and more details, next tap "Submit" to report the issue. Our engineers will record your problem and research possible solutions
